

3-Axis Force Sensor K3A100 5kN/20kN

Item number: 12964

The K3A 3-axis sensor is designed for measuring force in three mutually perpendicular axes. This product group has a wide measurement ranges for the forces.

The K3A S3-Axis Force Sensors are developed for the following applications:

1. Robotics,
2. Medical technology,
3. Measurements in automation technology,
4. Mounting and Assembling of Parts in Production Lines,
5. 6-Axis Force/Torque Platforms consisting of 4x K3A Sensors,
6. Research and Testing.

The calibration document contains the individual calibration factors and crosstalk data of the sensor.

The crosstalk optionally can be minimized by application of an additional error compensation matrix.

The K3A sensors can be operated without additional compensation matrix.

During the application, please take care to ensure that the maximum bending moments are not exceeded.

The lever arms are calculated from the sensor origin, which is in the center of the mounting surface (on the top surface).
