

## Force Sensor KD45 2N

Item number: 15

The force sensor KD45 has the geometry of a miniature load cell. It is fastened on one side using the through holes  $\varnothing 3.2$ . There is a thread M3 for force transmission.

Force transmission is displaced parallel under loading. The force sensor tolerates displacements of force transmission and lateral forces due to its design as a double beam.

The force sensor KD45 is designed as a multi-range sensor. The accuracy of 0.1% is already reached at a nominal output of 0.5mV/V. This means that the zero point stability is 4 times higher than in a sensor with nominal output of 2mV/V. The KD45 force sensor can be used up to an output signal of 2mV/V or up to four times the specified nominal force.

## Technical Drawing

## Technical Data

| Basic Data           |                     | Unit |
|----------------------|---------------------|------|
| Type                 | Kraftsensor         |      |
| Force direction      | Tension/Compression |      |
| Rated force Fx       | 2                   | N    |
| Force introduction   | Internal thread     |      |
| Dimension 1          | 1xM3x0,5            |      |
| Sensor Fastening     | Through-hole        |      |
| Dimension 2          | 2xØ3,2              |      |
| Operating force      | 400                 | %FS  |
| Rated displacement   | 0.1                 | mm   |
| Lateral force limit  | 500                 | %FS  |
| Material             | aluminum-alloy      |      |
| Natural frequency fx | 450                 | Hz   |
| Dimensions           | 45mm x 8mm x 8mm    |      |
| Height               | 8                   | mm   |
| Length or Diameter   | 45                  | mm   |
