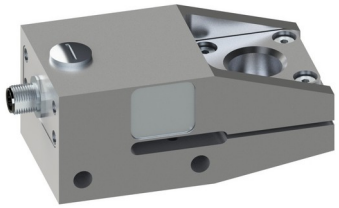
Force Sensor KD115u 1kN

Item number: 4124



The force sensor KD115u is particularly suitable for measuring the contact force between two electrodes of a spot welder. The distance between the electrodes can be adjusted in a range from 5mm to 20mm. Two Adapters with a circular pressure surface diameter 22mm are included.
The distance between the contact surfaces (electrode distance) is 10mm.

The force insertion can be adapted for measuring radial force of seals or for measuring the cutting force of a tool.
