

Force Sensor KR80 250kg

Item number: 892

The load cell KR80 is a precision load cell in cylindrical design. It is hermetically sealed by means of welding and available in a calibratable design according to the European requirements OIML R-60 up to class C6. It stands out thanks to its particularly low measurement path of just 0.1 mm.

The environmental protection is IP 66.

Force transmission is realised by a cylindrical load knob that has to be inserted into the hole $\varnothing D2$.

Optionally pendular bases for applications in weighing technology can be installed.
