

Force Sensor KM115z-AG 50kN

Item number: 13359

Highlights

- low height of the sensor body
- drag chain compatible connection cable
- or integrated M12 round plug

The KM65z force sensor is a tension/compression force sensor in diaphragma construction. He is characterized by

- a low height of 75 mm or 95 mm for the sensor body,
- two central M22 external thread for force introduction for the 50 kN variant
- two central M27 external thread for force introduction for the 100 kN variant

All variants are available with a permanently installed connection cable, Lapp drag chain cable FD/CP/Plus, or with a permanently installed M12 round plug connector, 4-pin.

The protection class of the sensor is IP 67.
